DETAILED ACTION

1. With regard to claims 6,7,8,11,13,16,17,18,19, Applicant is suggested to remove all – configured to – to make the limitations more positive for consideration.
2. With regard to claim 5, Applicant is suggested to add “first” between contains and priority data in ln. 1-2, so that the limitation reads – whether the first data contains first priority data -; and to add “second” between contains and priority data in ln. 4, so that the limitation reads – whether the second data contains second priority data --.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the first and second data, and a forwarding engine, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter: a first and second data, a forwarding engine, first and second priorities, low priority, valid. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction is required.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. **Claim 1** is rejected under 35 U.S.C. 103(a) as being unpatentable over Leung (U.S. Pat No. 6,466,580) in view of Wakeman et al. (U.S. Pat No. 5,594,702).

With regard to claim 1, Leung discloses receiving first data from the receiver 20, 70a, 70b (from 10/100 ports) and second data from the forwarding engine (from expansion port; expansion port can be hooked up to a forwarding engine or other

transmitter); determining and assigning (to different queues) a first and second (high and low) priority of data. However, Leung fails to explicitly show first and second data relating to a data frame.

In an analogous art, Wakeman discloses first and second data (address and data in Fig. 2A of either first or second data) relating to a data frame. Wakeman further explicitly show a forwarding engine 114, Fig. 1B(2).

A person of ordinary skill in the art would have been motivated to employ Wakeman in Leung in order to two data within a data frame. The suggestion/motivation to do so would have been to provide for storing and retrieving data being transferred between a number of network segments. Wakeman, col. 2, ln. 14-15. At the time the invention was made, therefore, it would have been obvious to one of ordinary skill in the art to which the invention pertains to combine Wakeman and Leung to obtain the invention as specified in claim 1.

Allowable Subject Matter

7. **Claims 8-20** are allowed.
8. Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
